

ASHLAND FIRE STATION #2

NEW FACILITY

Commercial

DESIGN-BUILD

- COMPLETED IN: 2021
- PROJECT DURATION:
- AREA: 8333 SF
- ABOUT THE PROJECT: The City of Ashland originally had only 1 fire station which was located in the downtown area. With a need for better time-efficient coverage to a growing town, the City Council approved the building of a 2nd location. With help by land donations, etc., a new fire station was built.
The new facility houses a kitchen, lockers, training area, administrative spaces, living quarters, a gym and two and a half open drive-thru bays. The fire station houses 3 shifts of 4 firemen for each shift.

📍 2112 Troy Road, Ashland, OH 44805
